

ASCOR Switching Products by Astronics

High-Density, High-Performance Switching

Count on ASCOR by Astronics switching products for proven performance in your most demanding high reliability applications. Compatible with VXI and PXI platforms, these switching products provide complete switching solutions for the systems of yesterday, today, and tomorrow.

4600 Universal Switching System

As a new paradigm in test system design, the 4600 offers a robust switching system complete with the ability to add test instruments. The 4600 acts as an ATE platform rather than a box of switches to deliver unprecedented functionality while reducing your cost of test.

3000 Series VXI Switch Modules

These VXI switch modules cover a wide range of switching applications and are equipped with a plug and play software driver. The 3000 Series VXI switch modules support a standard bandwidth from DC to 40 GHz.

7000 Series PXI Switch Modules

These PC-controlled switch modules offer high quality, low noise solutions for both PXI and CompactPCI switching from DC to microwave.
