

## PXI Instruments from Astronics

### Drive Your Test Systems Forward

Put the power of the PXI platform to work for you with an all-new line of PXI instrumentation from Astronics Test Systems.

Small size, power-packed, and cost-effective, these instruments provide the perfect upgrade for your test system. Whether you're injecting new life into existing VXI-based systems or designing the test system of the future, these PXI instruments deliver advanced functionality to ultimately reduce your cost of test.

### PXIe 1209 Pulse Pattern Generator

Gain high-performance at high resolution with this 2-channel, 100 MHz generator for dual independent pulse generation.

### PXIe 1802 Arbitrary Waveform Generator

Occupying just one PXI Express peripheral or hybrid slot, this 2-channel AWG offers the best speed and performance available for output frequencies up to 125 MHz.

### PXIe 1803 Digitizer

Offering the best speed and performance available for input frequencies up to 175 MHz, this 2-channel digitizer delivers exceptional signal quality.

### PXIe 2461 Frequency Time Interval Counter

Make up to 12 automatic measurements with this high-performance, 2-channel, universal 235 MHz frequency interval counter.

### PXIe 3352 Rubidium

The world's first PXI rubidium combines a PXIe based rubidium frequency reference with a GPS receiver into a single, high precision instrument.

### PXIe 6943 Digital Test Instrument

Conduct pattern-based digital test incorporating the latest parallel digital, serial, and bus protocols with this digital test instrument. TPS-compatible with legacy VXI digital test instruments.
